RICCARDO CINQUEMANI

## An Available Team

- Our core business is represented by the range of Bushings and Press Fittings: they are designed and manufactured according to VS FLUID design and they have been widely recognized and appreciated by the hydraulic market for some time now.
- All our heat and galvanizing treatments are subject to strict quality controls, according to the ISO 9227 reference standards to guarantee the excellence of our product.
- In addition to the standard figures present in our general Catalogue, we are able to provide customized solutions at the Customer's request thanks to our Development and Design Office always ready and available to solve our Customers' needs.

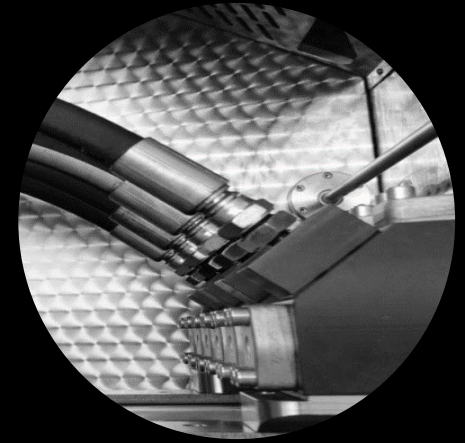

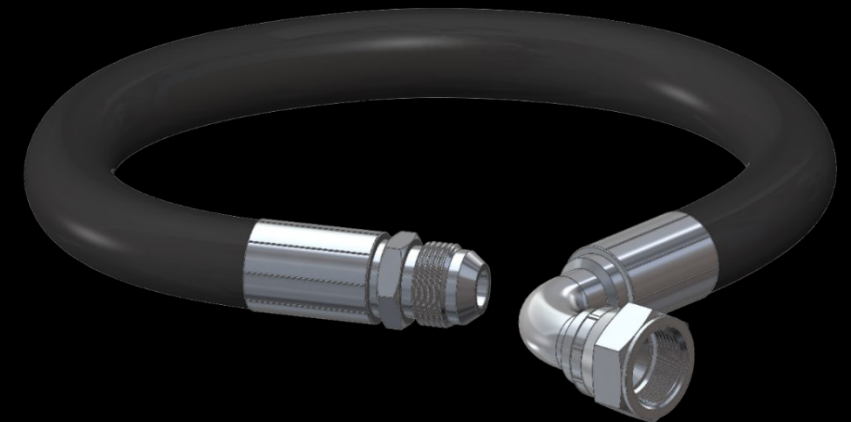

Thanks to our Tests and Inspections Department we are able to give all product certifications in real time

On request it is possible to provide a technical service for specific tests or special applications.
